

AMERICANS FOR MODERN TRANSPORTATION

Improved road and bridge infrastructure means
a **safer** environment for all drivers.

ROADS AND BRIDGES OF TODAY

\$206 Billion

Annual investment needed to
significantly improve roads and
bridges

188 Million

Daily trips across deficient bridges

\$160 Billion

In wasted time and fuel due to
highway congestion

43 years

Average age of the nation's bridges

ROADS AND BRIDGES OF TOMORROW

America needs a well-funded
Highway Trust Fund that is capable
of supporting infrastructure
maintenance and improvements
designed to meet tomorrow's needs.

Roads and bridges should be
constructed with features to
promote longevity and a safe, high-
quality driving experience.

For example:

- Rumble Strips
- Widened Shoulders And Lanes
- Well-Engineered Asphalt
- Improved Median Barriers
