

WIDESPREAD ADOPTION OF TWIN 33 TRAILERS WILL MAKE U.S. FREIGHT TRANSPORT SAFER & MORE EFFICIENT

AMERICANS FOR MODERN TRANSPORTATION

Widespread Adoption
Of Twin 33 Trailers
Would Result In:

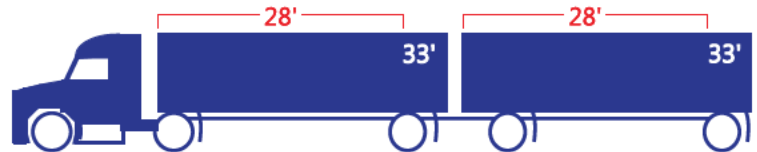

3.1 BILLION
Fewer Vehicle Miles Traveled
4,500
Fewer Annual Truck Crashes

\$2.6 BILLION
Dollars Saved In Shipping Costs
53.2 MILLION
Hours Saved Due to Less Congestion

255 MILLION
Fewer Gallons of Fuel
2.9 MILLION
Fewer Tons of CO₂ Emissions

Facts about Twin 33 trailers:

- Perform on par or better than Twin 28s in four critical safety measures and are less likely to roll over.
- Equipped with key safety technologies like forward collision and lane departure warning systems.
- Already authorized to operate on portions of highways in 20 states, but not local roads.
- Would instantly improve the efficiency of truck operations and help to alleviate the freight industry's ongoing capacity and workforce shortages.

Twin 33s are the trucks
of **tomorrow.**
